Subpart L—Methodology and Formulas for Allocation of Loan and Grant Program Funds

SOURCE: 50 FR 24180, June 10, 1985, unless otherwise noted.

§ 1940.551 Purpose and general policy.

(a) The purpose of this subpart is to set forth the methodology and formulas by which the Administrator of the Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 allocates program funds to the States. (The term *State* means any of the States of the United States, the Commonwealth of Puerto Rico, any territory or possession of the United States, or the Western Pacific Areas.)

(b) The formulas in this subpart are used to allocate program loan and grant funds to State Offices so that the overall mission of the Agency can be carried out. Considerations used when developing the formulas include enabling legislation, congressional direction, and administration policies. Allocation formulas ensure that program resources are available on an equal basis to all eligible individuals and organizations.

(c) The actual amounts of funds, as computed by the methodology and formulas contained herein, allocated to a State for a funding period are distributed to each State Office by an exhibit to this subpart. The exhibit is available for review in any FmHA or its successor agency under Public Law 103-354 State Office. The exhibit also contains clarifications of allocation policies and provides further guidance to the State Directors on any suballocation within the State. FmHA or its successor agency under Public Law 103-354 will pub-

§ 1940.552 Definitions.

(a) *Amount available for allocation.* Funds appropriated or otherwise made available to the Agency for use in authorized programs. On occasion, the allocation of funds to States may not be practical for a particular program due to funding or administrative constraints. In these cases, funds will be controlled by the National Office.

(b) *Basic formula criteria, data source and weight.* Basic formulas are used to calculate a basic state factor as a part of the methodology for allocating funds to the States. The formulas take a number of criteria that reflect the funding needs for a particular program and through a normalization and weighting process for each of the criteria calculate the basic State Factor (SF). The data sources used for each criteria is believed to be the most current and reliable information that adequately quantifies the criterion. The weight, expressed as a percentage, gives a relative value to the importance of each of the criteria.

(c) *Basic formula allocation.* The result of multiplying the amount available for allocation less the total of any amounts held in reserve or distributed by base or administrative allocation times the basic State factor for each State. The basic formula allocation (BFA) for an individual State is equal to:

$$BFA = (\text{Amount available for allocation} - \text{NO reserve} - \text{Total base and administrative allocations}) \times SF.$$

(d) *Transition formula.* A formula based on a proportional amount of previous year allocation used to maintain program continuity by preventing large fluctuations in individual State allocations. The transition formula limits allocation shifts to any particular State in the event of changes from year to year of the basic formula, the basic criteria, or the weights given the criteria. The transition formula first checks whether the current year's
